

# Typical Product Specifications & Properties

## 2,6-dimethylpyridine

**CAS Number: : 108-48-5**

| Specifications   | Limits                          |
|------------------|---------------------------------|
| Density          | 0.920                           |
| Odor             | peppermint odor                 |
| Refractive Index | 1.4970                          |
| Molecular weight | 107.16                          |
| Color            | colorless to pale yellow liquid |
| Flash Point      | 33 c                            |
| Solubility       | water, alcohol, ether           |
| Boiling Point    | 143-145 c                       |
