Typical Product Specifications & Properties

2-Amino-3-ethylpentanoic acid

CAS Number: : 14328-54-2

| Specifications | Limits |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure |  The chemical structure shows a five-membered ring with a carboxylic acid group (-COOH) at the 1-position, an amino group (-NH2) at the 2-position, and an ethyl group (-CH2CH3) at the 3-position. The ring is fused to a six-membered ring, which has a hydroxyl group (-OH) at the 1-position and a methyl group (-CH3) at the 2-position. The stereochemistry is indicated with wedges and dashes. |
