

Typical Product Specifications & Properties

2-Azabutane, N-[[2-pyrrolidin-1-yl]cyclohexyl]-4-[3,4-dichlorophenyl]-

CAS Number: : 15332-50-0

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a complex molecule with a central cyclohexane ring. Attached to this ring is a pyrrolidine ring (a five-membered ring with one nitrogen atom). Another attachment point on the cyclohexane ring leads to a butane chain, which is further substituted with a 3,4-dichlorophenyl group. The structure is rendered in a 3D-like perspective with stereochemical bonds.</p>
