## Typical Product Specifications & Properties

# 2-Butyryl furan

CAS Number: : 4208-57-5

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Appearance         | colorless clear liquid                                                              |
| Refractive Index   | 1.48900 to 1.49500 @ 20.00 °C                                                       |
| Assay              | 97.00 to 100.00 %                                                                   |
| Pounds/Gallon      | 8.737 to 8.787                                                                      |
| Boiling Point      | 195.00 °C. @ 760.00 mm Hg                                                           |
| Vapor Pressure     | 0.248000 mm/Hg @ 25.00 °C                                                           |
| Flash Point        | 189.00 °F.TCC                                                                       |
| Odor               | balsamic                                                                            |
| Specific gravity   | 1.05000 to 1.05600 @ 25.00 °C                                                       |
| Acid Value         | 1.00 max. KOH/g                                                                     |
| logP (o/w)         | 1.58                                                                                |
