## Typical Product Specifications & Properties

# 2-ethoxy-3-ethyl pyrazine

CAS Number: : 35243-43-7

| Specifications     | Limits                                                                                                                                                                     |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assay              | 95.00 to 100.00 %                                                                                                                                                          |
| Vapor Pressure     | 0.558000 mm/Hg @ 25.00 °C                                                                                                                                                  |
| logP (o/w)         | 2.28                                                                                                                                                                       |
| Odor               | raw potato                                                                                                                                                                 |
| Boiling Point      | 195.00 to 197.00 °C. @ 760.00 mm Hg                                                                                                                                        |
| Flash Point        | 157.00 °F.TCC                                                                                                                                                              |
