## Typical Product Specifications & Properties

# 2-Furaldehyde

CAS Number: : 98-01-1

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Boiling Point      | 161.7 c                                                                             |
| Density            | 1.1598 (204 c)                                                                      |
| Color              | colorless liquid (pure)                                                             |
| Odor               | almond-like odor                                                                    |
| Chemical Structure |  |
| Flash Point        | 60 c                                                                                |
| Refractive Index   | 1.5260 (20 c)                                                                       |
| Solubility         | alcohol, ether, benzene, 8.3 in water                                               |
| Molecular weight   | 96.08                                                                               |
