## Typical Product Specifications & Properties

# 2-Methyl-3-mercapto furan

CAS Number: : 28588-74-1

| Specifications     | Limits                                                                                                                                                                     |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Insolubility       | in water                                                                                                                                                                   |
| Odor               | pungent, sulphurous, meaty odor                                                                                                                                            |
| Molecular weight   | 114.17                                                                                                                                                                     |
| Flash Point        | (cc) 36 c                                                                                                                                                                  |
| Solubility         | most org. solvs.                                                                                                                                                           |
| Boiling Point      | 57-60 c ( 50 mbar)                                                                                                                                                         |
