## Typical Product Specifications & Properties

# 2-(Pent-4-enoyl)cyclohexan-1-one

CAS Number: : 13899-23-5

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure | <br>The chemical structure shows a cyclohexanone ring with a pent-4-enoyl group attached at the 2-position. The enoyl group consists of a five-carbon chain with a double bond between the second and third carbons, and a carbonyl group at the first carbon. The structure is drawn with stereochemistry indicating a specific enantiomer. |
