## Typical Product Specifications & Properties

# 3,4-Diaminobenzotrifluoride

CAS Number: : 368-71-8

| Specifications   | Limits                                                  |
|------------------|---------------------------------------------------------|
| Molecular weight | 176.14                                                  |
| InChI            | 1S/C7H7F3N2/c8-7(9,10)4-1-2-5(11)6(12)3-4/h1-3H,11-12H2 |
| InChIKey         | RQWJHUJJBYMJMN-UHFFFAOYSA-N                             |
| BRN Number       | 909258                                                  |
| Boiling Point    | 253?                                                    |
| Flash Point      | 111?                                                    |
| Density          | 1.381                                                   |
| Water solubility | Miscible with water.                                    |
| Melting Point    | 56-58 &deg;C                                            |
