## Typical Product Specifications & Properties

# 3,4-Dimethylbenzaldehyde

CAS Number: : 5973-71-7

| Specifications   | Limits                                                  |
|------------------|---------------------------------------------------------|
| Molecular weight | 134.18                                                  |
| EINECS           | 227-770-2                                               |
| InChI            | 1S/C9H10O/c1-7-3-4-9(6-10)5-8(7)2/h3-6H,1-2H3           |
| InChIKey         | POQJHLBMLVTHAU-UHFFFAOYSA-N                             |
| Boiling Point    | 226 &deg;C                                              |
| Sensitive        | Air Sensitive                                           |
| Water solubility | Soluble in ethanol, ether, toluene. Insoluble in water. |
| Refractive Index | 1.551                                                   |
| Flash Point      | 225 &deg;F                                              |
| BRN Number       | 1634270                                                 |
| Melting Point    | 225-226 C                                               |
| Density          | 1.012 g/mL at 25 &deg;C                                 |
