## Typical Product Specifications & Properties

# 3-Ethylaniline

CAS Number: : 587-02-0

| Specifications      | Limits                                         |
|---------------------|------------------------------------------------|
| Molecular weight    | 121.18                                         |
| EINECS              | 209-594-8                                      |
| InChI               | 1S/C8H11N/c1-2-7-4-3-5-8(9)6-7/h3-6H,2,9H2,1H3 |
| InChIKey            | AMKPQMFZCBTTAT-UHFFFAOYSA-N                    |
| Melting Point       | -8 &deg;C                                      |
| Storage Temperature | Store below +30&deg;C.                         |
| Boiling Point       | 212 &deg;C                                     |
| Flash Point         | 185 &deg;F                                     |
| Density             | 0.975 g/mL at 25 &deg;C                        |
| Refractive Index    | 1.555                                          |
| Boiling Point       | 214 &deg; C                                    |
| Melting Point       | -6.40E+01 &deg; C                              |

| Specifications               | Limits                                 |
|------------------------------|----------------------------------------|
| log P (octanol-water)        | 2.110                                  |
| Atmospheric OH Rate Constant | 2.01E-10 cm <sup>3</sup> /molecule-sec |
| Melting Point                | -8 °C                                  |
| Form                         | Powder                                 |
| Color                        | White to light beige or light gray     |
