Typical Product Specifications & Properties

3-Maleimidopropionic Acid

CAS Number: : 7423-55-4

Specifications	Limits
Chemical Structure	 The chemical structure shows a maleimide ring (a five-membered ring with two carbonyl groups and one nitrogen atom) attached to a propionic acid chain. The maleimide ring is drawn with a nitrogen atom at the top, and the propionic acid chain extends downwards from the nitrogen atom. The propionic acid chain consists of a methylene group, a carbonyl group, and a carboxylic acid group. The carboxylic acid group is shown with a hydrogen atom and a hydroxyl group. The maleimide ring is drawn with a nitrogen atom at the top, and the propionic acid chain extends downwards from the nitrogen atom. The maleimide ring is drawn with a nitrogen atom at the top, and the propionic acid chain extends downwards from the nitrogen atom.
