## Typical Product Specifications & Properties

# 4-((2-methyl-3-furyl)thio)-5-nonanone

CAS Number: : 61295-50-9

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Assay              | 98.00 to 100.00 %                                                                   |
| Specific gravity   | 1.00000 to 1.01200 @ 25.00 °C                                                       |
| Flash Point        | 304.00 °F.TCC                                                                       |
| logP (o/w)         | 4.66                                                                                |
| Odor Type          | meaty                                                                               |
| Odor               | roasted meaty                                                                       |
| Appearance         | colorless to pale yellow clear liquid                                               |
| Pounds/Gallon      | 8.321 to 8.421                                                                      |
| Refractive Index   | 1.48900 to 1.49600 @ 20.00 °C                                                       |
| Boiling Point      | 102.00 to 103.00 °C. @ 0.25 mm Hg                                                   |
| Vapor Pressure     | 0.000213 mm/Hg @ 25.00 °C                                                           |
