Typical Product Specifications & Properties

4-acetyl-2-isopropenyl pyridine

CAS Number: : 142896-12-6

Specifications	Limits
Assay	95.00 to 100.00 %
Boiling Point	277.00 to 279.00 °C. @ 760.00 mm Hg
Vapor Pressure	0.004340 mm/Hg @ 25.00 °C
logP (o/w)	1.40
Odor Type	herbal
Odor	herbal green fermented roasted
Flash Point	264.00 °F.TCC
Chemical Structure	 The chemical structure shows a pyridine ring with an isopropenyl group at the 2-position and an acetyl group at the 4-position. The pyridine ring is represented by a hexagon with a blue nitrogen atom at the bottom. The isopropenyl group is a three-carbon chain with a double bond between the second and third carbons, attached to the second carbon of the pyridine ring. The acetyl group is a two-carbon chain with a double-bonded oxygen atom, attached to the fourth carbon of the pyridine ring.
