## Typical Product Specifications & Properties

# 4-B-Phorbol-12-Myristate-13-Acetate

CAS Number: : 16561-29-8

| Specifications      | Limits                                                                                                                                    |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight    | 616.83                                                                                                                                    |
| Water solubility    | Very soluble in methanol, soluble in DMSO, chloroform, ethanol or acetone, ether, ethyl acetate, DMF or acetonitrile. Insoluble in water. |
| Sensitive           | Light Sensitive                                                                                                                           |
| Density             | 1.17±0.1 g/cm <sup>3</sup> (20 °C 760 Torr)                                                                                               |
| Solubility          | DMSO: DMSO solutions can be stored dark at -20°C for at least six months.soluble                                                          |
| Storage Temperature | -20&deg;C                                                                                                                                 |
