## Typical Product Specifications & Properties

# 4-chloro-7-nitrobenzo[c] [1,2,5]oxadiazole

CAS Number: : 10199-89-0

| Specifications      | Limits                                                                    |
|---------------------|---------------------------------------------------------------------------|
| Molecular weight    | 199.55                                                                    |
| EINECS              | 233-496-4                                                                 |
| SMILES              | <chem>c12c(c(ccc1[N+](=O)[O-])Cl)non2</chem>                              |
| InChI               | IGHBXJSNZCFXNK-UHFFFAOYSA-N                                               |
| InChIKey            | 1S/C6H2ClN3O3/c7-3-1-2-4(10(11)12)6-5(3)8-13-9-6/h1-2H                    |
| Solubility          | Soluble in methanol, dimethylsulfoxide, dimethylformamide and chloroform. |
| Storage Temperature | 2-8&deg;C                                                                 |
| BRN Number          | 614212                                                                    |
| Water solubility    | soluble                                                                   |
| Melting Point       | 97-99 &deg;C                                                              |
