## Typical Product Specifications & Properties

# 4-(p-Tolyl)butyric acid

CAS Number: : 4521-22-6

| Specifications   | Limits                                                                 |
|------------------|------------------------------------------------------------------------|
| Molecular weight | 178.23                                                                 |
| EINECS           | 224-848-8                                                              |
| InChI            | 1S/C11H14O2/c1-9-5-7-10(8-6-9)3-2-4-11(12)13/h5-8H,2-4H2,1H3,(H,12,13) |
| InChIKey         | IXWOVMRDYFFXGI-UHFFFAOYSA-N                                            |
| Density          | 1.072                                                                  |
| BRN Number       | 639705                                                                 |
| Boiling Point    | 150 &deg;C / 1mmHg                                                     |
| Melting Point    | 54-58 &deg;C                                                           |
