## Typical Product Specifications & Properties

# 5-Chloro-2-(Methylamino)Benzophenone

CAS Number: : 1022-13-5

| Specifications   | Limits                                                                      |
|------------------|-----------------------------------------------------------------------------|
| Molecular weight | 245.70                                                                      |
| EINECS           | 213-822-1                                                                   |
| SMILES           | <chem>c1(c(ccc(c1)Cl)NC)C(c1ccccc1)=O</chem>                                |
| InChI            | 1S/C14H12ClNO/c1-16-13-8-7-11(15)9-12(13)14(17)10-5-3-2-4-6-10/h2-9,16H,1H3 |
| InChIKey         | WPNMLCMTDCAN0Z-UHFFFAOYSA-N                                                 |
| BRN Number       | 882187                                                                      |
| Stability        | Stable. Incompatible with strong oxidizing agents.                          |
| Melting Point    | 93-95 &deg;C                                                                |
