

Typical Product Specifications & Properties

5-hydroxy-3-methyl-1,3-benzoxazol-2(3H)-one

CAS Number: : 175733-76-3

Specifications	Limits
Chemical Structure	 The chemical structure is a complex polycyclic molecule. It features a benzene ring fused to a five-membered ring that contains an oxygen atom and a nitrogen atom. A methyl group is attached to the carbon adjacent to the nitrogen, and a hydroxyl group is attached to the carbon adjacent to the oxygen. The structure is labeled with 'H' and 'O' atoms. A watermark for 'parchem fine & specialty chemicals' is visible in the background.
