

## Typical Product Specifications & Properties

# 5-Methyldeoxycytidine 5'-(trihydrogen diphosphate)

CAS Number: : 118790-66-2

| Specifications     | Limits   |
|--------------------|--|
| Chemical Structure | <br>The chemical structure shows a pyrimidine ring with a methyl group at the 5-position and a deoxyribose sugar at the 1-position. The sugar is linked to a triphosphate group at the 5' position. The triphosphate group is shown as a chain of three phosphate groups, with the terminal phosphate having three hydrogens attached. The structure is overlaid with a watermark for 'parchem fine & specialty chemicals'. |
