

Typical Product Specifications & Properties

6-[4-(1-Cyclohexyl-1H-tetrazol-5-yl)butoxy]-1-hydroxyquinolin-2(1H)-one

CAS Number: : 1140833-81-3

Specifications	Limits
Chemical Structure	 The chemical structure is a complex molecule. It features a quinolin-2(1H)-one core. At position 1, there is a hydroxyl group. At position 6, there is a 4-(1-cyclohexyl-1H-tetrazol-5-yl)butoxy group. The quinoline ring is fused to a six-membered ring containing a nitrogen atom and a carbonyl group. The butoxy chain is attached to the quinoline ring at position 6. The tetrazole ring is attached to the butoxy chain at position 4. The cyclohexyl ring is attached to the tetrazole ring at position 1.
