## Typical Product Specifications & Properties

# 6,7-Dimethoxycoumarin

CAS Number: : 120-08-1

| Specifications               | Limits                                                           |
|------------------------------|------------------------------------------------------------------|
| Molecular weight             | 206.19                                                           |
| EINECS                       | 204-369-0                                                        |
| SMILES                       | <chem>c12c(cc(OC)c(c1)OC)oc(=O)cc2</chem>                        |
| InChI                        | 1S/C11H10O4/c1-13-9-5-7-3-4-11(12)15-8(7)6-10(9)14-2/h3-6H,1-2H3 |
| InChIKey                     | GUAFOGOEJLSQBT-UHFFFAOYSA-N                                      |
| log P (octanol-water)        | 1.160                                                            |
| Melting Point                | 145.5 °C                                                         |
| Atmospheric OH Rate Constant | 3.10E-11 cm <sup>3</sup> /molecule-sec                           |
| Melting Point                | 145°C                                                            |
| Merck                        | 13,8479                                                          |
