

Typical Product Specifications & Properties

6-(chloromethyl)-N-(2,4-dichlorophenyl)-1,3,5-triazine-2,4-diamine

CAS Number: : 1379811-51-4

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a 1,3,5-triazine ring substituted at the 2-position with a 2,4-dichlorophenyl group and at the 6-position with a chloromethyl group. The triazine ring has nitrogen atoms at positions 1, 3, and 5. The 2,4-dichlorophenyl group consists of a benzene ring with chlorine atoms at the 2 and 4 positions. The chloromethyl group is a -CH2Cl group. Stereochemistry is indicated with wedges and dashes at the 4-position of the triazine ring and the 1-position of the phenyl ring.</p>
