Typical Product Specifications & Properties

7-(Chloromethyl)isochromane

CAS Number: : 1225521-01-6

Specifications	Limits
Chemical Structure	 The chemical structure shows a tricyclic isochroman system. It features a benzene ring fused to a six-membered ring containing an oxygen atom, which is further fused to a five-membered ring containing a nitrogen atom. A chloromethyl group (-CH2Cl) is attached to the 7-position of the benzene ring. Stereochemistry is indicated with wedges and dashes at several chiral centers.
