## Typical Product Specifications & Properties

# 7-Methoxy-8-quinolinamine

CAS Number: : 83010-84-8

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                      |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Melting Point      | 119 C                                                                                                                                                                                                                                                                                                                                       |
| Appearance         | Light brown crystalline powder                                                                                                                                                                                                                                                                                                              |
| Molecular weight   | 225.55                                                                                                                                                                                                                                                                                                                                      |
| Chemical Structure | <br>The chemical structure shows a quinoline ring system. At the 7-position, there is a methoxy group (-OCH3). At the 8-position, there is an amine group (-NH2). The structure is overlaid with the Parchem logo and text 'fine & specialty chemicals'. |
