## Typical Product Specifications & Properties

# 9-decen-1-al

CAS Number: : 39770-05-3

| Specifications   | Limits                                                                                          |
|------------------|-------------------------------------------------------------------------------------------------|
| Refractive Index | 1.43800 to 1.44200 @ 20.00 °C                                                                   |
| Odor             | aldehydic dewy rose waxy floral                                                                 |
| Pounds/Gallon    | 7.015 to 7.065                                                                                  |
| Acid Value       | 5.00 max. KOH/g                                                                                 |
| Flash Point      | 208.00 °F.TCC                                                                                   |
| logP (o/w)       | 3.58                                                                                            |
| Storage          | cool, dry place, tightly sealed containers, protected from heat and light, store under nitrogen |
| Odor Type        | aldehydic                                                                                       |
| Assay            | 98.00 to 100.00 %                                                                               |
| Boiling Point    | 211.00 °C. @ 760.00 mm Hg                                                                       |
| Appearance       | colorless clear liquid                                                                          |
| Specific gravity | 0.84300 to 0.84900 @ 25.00 °C                                                                   |
