Typical Product Specifications & Properties

Adrogolide

CAS Number: : 166591-11-3

Specifications	Limits
Assay/Purity	Typically NLT 98%
Molecular weight	315.429
Chemical Structure	 The chemical structure of Adrogolide is a complex molecule featuring a central benzene ring. It has a thiazolidine ring system attached to one side, which includes a sulfur atom and a nitrogen atom. Another side of the benzene ring is substituted with a propyl group and a methoxy group. The structure is shown with stereochemical indicators (wedges and dashes) at the chiral centers.
