## Typical Product Specifications & Properties

# Aluminum Dextran

CAS Number: : 7047-84-9

| Specifications   | Limits                                                                                                             |
|------------------|--------------------------------------------------------------------------------------------------------------------|
| Molecular weight | 344.47                                                                                                             |
| SMILES           | <chem>CCCCCCCCCCCCCCCCCCCC(=O)O[Al](O)O</chem>                                                                     |
| InChI            | UGMCXQCYOVCMTB-UHFFFAOYSA-K                                                                                        |
| InChIKey         | 1S/C18H36O2.Al.2H2O/c1-2-3-4-5-6-7-8-9-10-11-12-13-14-15-16-17-18(19)20;;;/h2-17H2,1H3,(H,19,20);;2*1H2/q;+3;;/p-3 |
| Melting Point    | 155 &deg; C                                                                                                        |
