## Typical Product Specifications & Properties

# amyl valerate

CAS Number: : 2173-56-0

| Specifications   | Limits                                      |
|------------------|---------------------------------------------|
| Density          | 0.865 gml                                   |
| Appearance       | colorless liquid                            |
| Melting Point    | 81 C                                        |
| Flash Point      | 77 C                                        |
| Boiling Point    | 188 C at 760 mmHg                           |
| Refraction       | 1.412-1.422 at 20C                          |
| Specific gravity | 0.858-0.868 at 20C                          |
| Purity           | 98%                                         |
| Insolubility     | in water                                    |
| Odor             | fruity, ethereal, apple-like odor and taste |
| Refractive Index | 1.417                                       |
| Molecular weight | 172.27                                      |
