

# Typical Product Specifications & Properties

## Anethole

**CAS Number: : 104-46-1**

| Specifications   | Limits                                                          |
|------------------|-----------------------------------------------------------------|
| Density          | 0.991 (2020 c)                                                  |
| Very Soluble     | in water                                                        |
| Odor             | wh. cryst. or lt. yel. liq. above 23 c, anise odor, sweet taste |
| Melting Point    | 22.5 c                                                          |
| Refractive Index | 1.557-1.561                                                     |
| Molecular weight | 148.22                                                          |
| Flash Point      | 90 c                                                            |
| Boiling Point    | 235.3 c                                                         |
