## Typical Product Specifications & Properties

# Ascorbyl Stearate

CAS Number: : 10605-09-1

| Specifications   | Limits                                                                                                                                         |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight | 442.59                                                                                                                                         |
| EINECS           | 234-231-5                                                                                                                                      |
| SMILES           | <chem>CCCCCCCCCCCCCCCCCCCC(=O)OC[C@H](O)[C@H]1OC(=O)C(=C1O)O</chem>                                                                            |
