## Typical Product Specifications & Properties

# benzyl laurate

CAS Number: : 140-25-0

| Specifications   | Limits                                    |
|------------------|-------------------------------------------|
| Color            | Colorless                                 |
| Acid Number      | 2.0 Max                                   |
| Odor             | Very faint, fatty odor                    |
| Boiling Point    | 183°C at 1 mmHg                           |
| Purity           | 98.0% min                                 |
| Density          | 0.930-0.940 g/ml                          |
| Flash Point      | 100C Min CC                               |
| Appearance       | Clear liquid                              |
| Insolubility     | in glycerine, propylene glycol, and water |
| Melting Point    | 8-9 c                                     |
| Refractive Index | 1.479-1.485                               |
| Molecular weight | 290.49                                    |
