## Typical Product Specifications & Properties

# beta-ionyl acetate

CAS Number: : 22030-19-9

| Specifications   | Limits                                                                                    |
|------------------|-------------------------------------------------------------------------------------------|
| Appearance       | colorless clear liquid                                                                    |
| Specific gravity | 0.93400 to 0.94400 @ 25.00 °C                                                             |
| Acid Value       | 1.00 max. KOH/g                                                                           |
| Vapor Density    | >1                                                                                        |
| Odor Type        | floral                                                                                    |
| Odor             | Sweet, woody, ionone-type raspberry notes with floral, seedy and jammy strawberry nuances |
| Refractive Index | 1.47500 to 1.48200 @ 20.00 °C                                                             |
| Vapor Pressure   | 0.000735 mm/Hg @ 25.00 °C                                                                 |
| Flash Point      | 210.00 °F.TCC                                                                             |
| Taste            | Woody, slightly floral ionone raspberry/berry-like character with jammy floral nuances    |
| Pounds/Gallon    | 7.772 to 7.855                                                                            |
| Boiling Point    | 120.00 °C. @ 2.00 mm Hg                                                                   |
