## Typical Product Specifications & Properties

# bis(2-furyl) methane

CAS Number: : 1197-40-6

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Vapor Pressure     | 0.594000 mm/Hg @ 25.00 °C                                                           |
| Assay              | 95.00 to 100.00 %                                                                   |
| Boiling Point      | 194.00 to 195.00 °C. @ 760.00 mm Hg                                                 |
| Flash Point        | 156.00 °F.TCC                                                                       |
| Appearance         | colorless clear liquid                                                              |
| logP (o/w)         | 2.53                                                                                |
