## Typical Product Specifications & Properties

# Bismuth citrate

CAS Number: : 813-93-4

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Slightly Soluble   | in alcohol                                                                          |
| Insolubility       | in water                                                                            |
| Melting Point      | dec.                                                                                |
| Molecular weight   | 398.09                                                                              |
| Specific gravity   | 3.458                                                                               |
| Solubility         | ammonia or alkali citrates                                                          |
