## Typical Product Specifications & Properties

# Butyl sulfide

CAS Number: : 554-40-1

| Specifications      | Limits                                                                |
|---------------------|-----------------------------------------------------------------------|
| Molecular weight    | 146.29                                                                |
| EINECS              | 208-870-5                                                             |
| Color               | Clear colorless to very slightly yellow                               |
| FEMA                | 2215   BUTYL SULFIDE                                                  |
| Storage Temperature | Store below +30&deg;C.                                                |
| BRN Number          | 1732829                                                               |
| Vapor Density       | 5.07                                                                  |
| Boiling Point       | 188-189 &deg;C                                                        |
| Water solubility    | Silghtly miscible with water. Miscible with olive oil and almond oil. |
| Merck               | 14,1590                                                               |
| Refractive Index    | 1.452                                                                 |
| Stability           | Stable. Combustible. Incompatible with strong oxidizing agents.       |

| Specifications | Limits                    |
|----------------|---------------------------|
| Melting Point  | -76 &deg;C                |
| Density        | 0.838 g/mL at 25 &deg;C   |
| Flash Point    | 170 &deg;F                |
| Vapor Pressure | 5.17 mm Hg ( 37.7 &deg;C) |
| Form           | Liquid                    |
