## Typical Product Specifications & Properties

# Calcium Citrate Malate

CAS Number: : 813-94-5

| Specifications           | Limits                                             |
|--------------------------|----------------------------------------------------|
| Description              | Calcium citrate malate is a food grade composition |
| pH                       | 2-9                                                |
| Color, APHA; ASTM D 1209 | White to off white                                 |
| Lead                     | <1 ppm                                             |
| Arsenic PPM              | <1 ppm                                             |
| E Coli & Salmonella      | Negative                                           |
| Coliform MPN             | Negative                                           |
| Staphylococcus           | Negative                                           |
| Total Plate Count        | <3000/gm                                           |
| Yeast                    | <300/gm                                            |
| Storage                  | 25kg or 50 kg net fiber drum with sealed poly line |
| Ca Content               | 2.03-28.8%                                         |
