## Typical Product Specifications & Properties

# Calcium Lactate, USP

CAS Number: : 5743-47-5

| Specifications      | Limits                                                      |
|---------------------|-------------------------------------------------------------|
| Molecular weight    | 218.22                                                      |
| EINECS              | 248-953-3                                                   |
| InChI               | 1S/2C3H6O3.Ca/c2*1-2(4)3(5)6;/h2*2,4H,1H3,(H,5,6);/q;+2/p-2 |
| InChIKey            | MKJXYGKVIBWPFZ-UHFFFAOYSA-L                                 |
| Storage Temperature | 2-8&deg;C                                                   |
| Solubility          | H2O: 50 mg/mL                                               |
| Form                | powder                                                      |
| Melting Point       | 240 &deg;C                                                  |
| Water solubility    | soluble                                                     |
