## Typical Product Specifications & Properties

### carnauba wax

CAS Number: : 8015-86-9

| Specifications        | Limits                                                                               |
|-----------------------|--------------------------------------------------------------------------------------|
| Density               | 0.995 (1515 c)                                                                       |
| Saponification number | 78-89                                                                                |
| Slightly Soluble      | in boiling alcohol                                                                   |
| Melting Point         | 80.00 to 86.00 °C. @ 760.00 mm Hg                                                    |
| Odor                  | odorless                                                                             |
| Appearance            | pale yellow to amber brown solid                                                     |
| Storage               | store in cool, dry place in tightly sealed containers, protected from heat and light |
| Shelf Life            | 24.00 month(s) or longer if stored properly                                          |
| Insolubility          | in water                                                                             |
| Refractive Index      | 1.4500                                                                               |
| Acid Number           | 2-7                                                                                  |
| Solubility            | ether, alkalis, warm benzene, warm chloroform, toluene                               |
