## Typical Product Specifications & Properties

# d-2-Octanol

CAS Number: : 6169-06-8

| Specifications   | Limits                                                         |
|------------------|----------------------------------------------------------------|
| Molecular weight | 130.23                                                         |
| EINECS           | 228-213-6                                                      |
| InChI            | 1S/C8H18O/c1-3-4-5-6-7-8(2)9/h8-9H,3-7H2,1-2H3/t8-/m1/s1       |
| InChIKey         | SJWFXCIHNDVPSH-MRVPVSSYSA-N                                    |
| Boiling Point    | 175 &deg;C                                                     |
| Density          | 0.822 g/mL at 25 &deg;C                                        |
| BRN Number       | 1719323                                                        |
| Flash Point      | 160 &deg;F                                                     |
| Stability        | Stable. Combustible. Incompatible with strong oxidizing agents |
| Alpha            | 9.5 ° (neat)                                                   |
| Merck            | 14,6752                                                        |
| Refractive Index | 1.426                                                          |
