Typical Product Specifications & Properties

D-Tyrosine

CAS Number: : 556-02-5

Specifications	Limits
Direct Evaporative Cooling	310-314 c
Melting Point	300 c
Molecular weight	181.19
Solubility	53 gl in water
Chemical Structure	 The chemical structure of D-Tyrosine is shown, featuring a benzene ring with a hydroxyl group at the para position and a side chain with an amino group and a carboxylic acid group. The side chain is attached to the ring at the 1-position. The amino group is shown as a blue nitrogen atom with two hydrogen atoms, and the carboxylic acid group is shown as a red oxygen atom double-bonded to a carbon atom, which is also single-bonded to a hydroxyl group.
