## Typical Product Specifications & Properties

# Dichloroacetoneitrile

CAS Number: : 3018-12-0

| Specifications      | Limits                                                          |
|---------------------|-----------------------------------------------------------------|
| Molecular weight    | 109.94                                                          |
| EINECS              | 221-159-4                                                       |
| InChI               | 1S/C2HCl2N/c3-2(4)1-5/h2H                                       |
| InChIKey            | STZZWJCGRKXEFF-UHFFFAOYSA-N                                     |
| BRN Number          | 1739029                                                         |
| Boiling Point       | 110-112 &deg;C                                                  |
| Storage Temperature | 0-6&deg;C                                                       |
| Flash Point         | 96 &deg;F                                                       |
| Refractive Index    | 1.44                                                            |
| Stability           | Stable. Combustible. Incompatible with strong oxidizing agents. |
| Density             | 1.369 g/mL at 25 &deg;C                                         |
