## Typical Product Specifications & Properties

# Diethyl Propylmalonate

CAS Number: : 2163-48-6

| Specifications   | Limits                                                        |
|------------------|---------------------------------------------------------------|
| Molecular weight | 202.25                                                        |
| EINECS           | 218-492-2                                                     |
| InChI            | 1S/C10H18O4/c1-4-7-8(9(11)13-5-2)10(12)14-6-3/h8H,4-7H2,1-3H3 |
| InChIKey         | GRRSDGHTSMJICM-UHFFFAOYSA-N                                   |
| Flash Point      | 197 &deg;F                                                    |
| Density          | 0.987 g/mL at 25 &deg;C                                       |
| Boiling Point    | 221-222 &deg;C                                                |
| Solubility       | Soluble in Dichloromethane, Ethanol and Ethyl Acetate.        |
| Refractive Index | 1.418                                                         |
