## Typical Product Specifications & Properties

# Ethyl(3-fluoro-2-methylphenyl)sulfane

CAS Number: : 1267967-99-6

| Specifications     | Limits                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure |  <p>The chemical structure shows a benzene ring with a fluorine atom at the 3-position and a methyl group at the 2-position. An ethylsulfanyl group (-S-CH2-CH3) is attached to the 1-position of the ring. The structure is drawn with stereochemistry indicating a specific enantiomer.</p> |
