

Typical Product Specifications & Properties

Ethyl 5-bromo-2-cyano-3-fluorobenzoate

CAS Number: : 2044706-91-2

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Ethyl 5-bromo-2-cyano-3-fluorobenzoate is shown. It consists of a benzene ring with a cyano group (-C≡N) at position 2, a fluorine atom at position 3, and a bromine atom at position 5. The benzene ring is attached to an ethyl ester group (-COOCH₂CH₃) at position 1. The structure is overlaid with a large, faint 'parchem' watermark and the text 'fine & specialty chemicals'.</p>
