

Typical Product Specifications & Properties

Ethyl 6-chloroquinoline-4-carboxylate

CAS Number: : 1017414-83-3

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Ethyl 6-chloroquinoline-4-carboxylate is shown. It features a quinoline ring system. At the 4-position, there is a carboxylate group (COO-) with a red oxygen atom. At the 6-position, there is a chlorine atom (Cl) with a red chlorine atom. The structure is overlaid with a large, faint 'parchem' watermark and the text 'fine & specialty chemicals'.</p>
