

Typical Product Specifications & Properties

Ethyl(dimethyl)indigane

CAS Number: : 102091-56-5

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Ethyl(dimethyl)indigane is a complex polycyclic molecule. It features a central indole-like ring system fused with a cyclohexane ring and a five-membered ring containing a nitrogen atom. The structure is substituted with an ethyl group and two methyl groups. The molecule is shown in a 3D perspective with stereochemistry indicated by wedges and dashes. A watermark for 'parchem fine & specialty chemicals' is visible in the background.</p>
