

Typical Product Specifications & Properties

Ethyl Fenchol

CAS Number: : 18368-91-7

Specifications	Limits
Chemical Structure	 <p>The chemical structure of Ethyl Fenchol is a bicyclic monoterpene. It features a decalin core with a hydroxyl group (-OH) at the 1-position and an ethyl group (-CH₂CH₃) at the 2-position. The structure is shown with stereochemistry, including wedged and dashed bonds to indicate the three-dimensional arrangement of atoms. A watermark for 'parchem fine & specialty chemicals' is visible in the background of the structure.</p>
