Typical Product Specifications & Properties

Ethylamine, 2-(5-dimethylamino-1,3,4-thiadiazol-2-ylthio)-, dihydrochloride

CAS Number : 101418-30-8

| Specifications | Limits |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Structure |  The chemical structure shows a complex molecule with a thiadiazole ring system, an ethyl group, and a dihydrochloride salt. The structure is rendered in a 3D-like perspective with various atoms labeled with their symbols (C, H, N, O, S). |
