## Typical Product Specifications & Properties

# Ferric Chloride

CAS Number: : 7705-08-0

| Specifications   | Limits                                             |
|------------------|----------------------------------------------------|
| Density          | 2.898                                              |
| Slightly Soluble | in cs2                                             |
| Readily Soluble  | adily absorbs water in air to form hexahydrate     |
| Melting Point    | 292 c                                              |
| pH               | 1                                                  |
| Vapor Pressure   | 1 mm (194 c)                                       |
| Molecular weight | 162.21                                             |
| Solubility       | water, alcohol, glycerol, methanol, ether, acetone |
| Boiling Point    | 319 c                                              |
